

PAVAN KUMAR NARA

Bangalore, India | Mobile: +91-8277423385 | Email: pavannara95@gmail.com

PROFILE SUMMARY

- 10+ years of IT experience with **5 years as a Databricks Administrator** managing enterprise-scale data platforms on AWS & Azure.
- Deep expertise in Databricks Workspace Admin, Unity Catalog, Cluster & Pool Management, Delta Lake, Delta Live Tables, Databricks SQL, and Repos.
- Prior 5+ years as **SQL Server DBA** — T-SQL development, performance tuning, HA/DR (AlwaysOn AG), backup/recovery, and compliance management.
- Proficient in Apache Spark (PySpark), data pipeline optimization, cost governance, and security in multi-tenant Databricks environments.
- Strong cross-functional collaborator with data engineers, data scientists, and business stakeholders to deliver scalable lakehouse solutions.

TECHNICAL SKILLS

Databricks Platform	Workspace Admin, Unity Catalog, Cluster Policies, Instance Pools, Auto-Scaling, Delta Lake, DLT, Databricks SQL, Repos, Workflows/Jobs
Apache Spark	PySpark, Spark SQL, Structured Streaming, AQE, Broadcast Joins, Shuffle Optimization, Partition Tuning, Caching
SQL Server DBA	SQL Server 2012–2019, T-SQL, Index Tuning, Execution Plans, AlwaysOn AG, Log Shipping, Mirroring, SSMS, SQL Agent
Cloud Platforms	AWS (S3, IAM, EC2, Glue, Redshift, CloudWatch) Azure (ADLS Gen2, ADF, Azure SQL, Synapse Analytics)
Data Engineering	ETL/ELT, Bronze/Silver/Gold Lakehouse, Auto Loader, Schema Evolution, MERGE, VACUUM, OPTIMIZE, Z-Order
Security & Governance	RBAC, Row/Column-Level Security, Data Masking, Token Management, Audit Logs, IP Access Lists, Network Policies
Tools & DevOps	Git, Azure DevOps, Terraform (Databricks provider), Jira, Confluence, UNIX/Linux, PowerShell

PROFESSIONAL EXPERIENCE

Databricks Administrator

Client: Daimler | Jan 2021 – Jan 2026 | 5 Years

- Administered Databricks workspaces (Dev/QA/Prod) on AWS — user provisioning, PAT token management, IP access lists, and workspace configurations.
- Implemented and managed **Unity Catalog** for centralized data governance, fine-grained access control, and automated data lineage tracking across all catalogs.
- Designed **Cluster Policies and Instance Pools** with auto-scaling and spot instance strategies; reduced cloud compute cost by ~30% month-over-month.
- Architected **Bronze/Silver/Gold Delta Lakehouse** — enforced schema evolution, MERGE operations, VACUUM/OPTIMIZE schedules, and Z-Ordering for fast queries.
- Built and maintained **Delta Live Tables (DLT)** pipelines with data quality expectations for real-time streaming and large-scale batch ingestion.
- Managed **Databricks Workflows and multi-task Jobs** — dependency chaining, retry policies, email/webhook alerts, and SLA-based scheduling.
- Configured **AWS S3 Auto Loader** for incremental ingestion; integrated Databricks with Glue Data Catalog, Redshift, and Kinesis Streams.
- Enforced **Row-Level Security (RLS) and Column Masking** via Unity Catalog dynamic views and attribute-based access policies.
- Tuned Spark workloads using AQE, broadcast join hints, coalesce/repartition strategies, and caching — reduced job runtimes by up to 40%.
- Managed **Databricks Repos and CI/CD pipelines** with Azure DevOps; automated notebook deployments across environments using Databricks CLI and REST APIs.
- Monitored platform health via **Ganglia, Spark UI, and Databricks Audit Logs**; configured CloudWatch dashboards and alerts for cluster failures and SLA breaches.
- Led Databricks Runtime upgrades, workspace migrations, and quarterly capacity-planning reviews; authored runbooks and admin playbooks for the ops team.

SQL Server DBA

Infosys Limited | Dec 2014 – Dec 2020 | 6 Years

- Installed, configured, and maintained SQL Server 2012/2016/2019 instances across enterprise environments maintaining 99.9% uptime SLA.
- Designed schemas, stored procedures, functions, and triggers; performed execution plan analysis and index optimization for critical OLTP workloads.
- Implemented **AlwaysOn Availability Groups and Database Mirroring** for HA/DR; led failover drills and DR testing with RTO < 15 minutes.
- Managed automated backup strategies (full/diff/log), point-in-time recovery, and tested DR runbooks to ensure business continuity compliance.
- Automated DBA routines (index rebuilds, stats updates, DBCC checks) via SQL Server Agent and PowerShell; reduced manual effort by 60%.
- Administered user accounts, roles, and auditing to meet SOX and internal security compliance; conducted regular access reviews.

EDUCATION & CERTIFICATIONS

AIT, Tirupathi | 2012

ertified Data Engineer Associate
ertified Associate Developer – Apache Spark
rtified: Azure Data Engineer Associate (DP-203)

PERSONAL DETAILS

Name: Pavan Kumar Nara
Location: Bangalore, India

Father's Name: Ramanaiah Nara
Marital Status: Married

DOB: 10-07-1991
Languages: English, Telugu, Hindi

I hereby declare that the above information is true to the best of my knowledge. | Place: Bangalore | Date: 21-07-2026 | Pavan Kumar Nara
